academic year '19-'20

— **\$120,000,000+** —

In scholarships & grants  
awarded in academic year '19-'20

*"As New Mexico's flagship university—and the only Research 1 institution in the State—The University of New Mexico is home to transformative, cutting-edge research, smart and compassionate health care providers, and brilliant, dedicated faculty and staff serving the educational needs of one of the most curious and diverse student bodies in the nation. Together, we ensure our students succeed, our unique culture flourishes, and our state economy provides opportunities for all New Mexicans."*

—Garnett S. Stokes, President

## TRANSFORMATIVE RESEARCH AT THE HIGHEST LEVEL

Cutting-edge research at UNM is a cornerstone to accelerating knowledge, lifting the communities we serve, advancing our economy, improving health outcomes and, most importantly, putting that power in the hands and minds of our students.

Collaborations and creative collisions across all dimensions of academia, health care, industry and the public sector result in UNM being an engine of innovation—one where our students study, explore and create with faculty who are at the forefront of their disciplines.

UNM is one of only 28 universities in the nation to hold both the classification of R1: doctoral universities with very high research activity and the Carnegie Elective Classification on Community Engagement (2020). These are not just bragging points—they are reflections of the incredible talent of the people who drive our mission, and our deep passion for serving the public good and enhancing our collective understanding of the world around us.
